

## Ultimus Announces Continued 400% Growth in *Composed Process Solutions* Customer-base

**New York, NY – March 30, 2017** – Ultimus, Inc., developer of [\*Composed Process Solutions\*](#) and Adaptive BPM Suite software, announced its second straight year of 400% growth in the number of new *Composed Process Solutions* (“CPS”) customers.

CPS is now in use on five continents and in eight industries including Commercial and Retail Banking, Insurance, Finance, CPG Manufacturing, Technology, Business Services, and Government.

Ultimus *Composed Process Solutions* technology is a completely new, “Industrial Approach” to low-code software development that produces unmatched gains in application delivery time, quality, manageability, cost, and business value. CPS “composes” enterprise software and software families on-demand from digital assets in a common CPS Digital Solution Ecosystem.

Karl Freiheit, President of Ultimus, commented “Although innovation has always been in Ultimus DNA, CPS stands out among our firsts because of the profound impact it is having on our customers’ digital transformation efforts. Our employees have worked passionately and diligently to make this exciting technology a reality and the market response we’ve gotten is a direct reflection of their effort and vision”.
