

FOR IMMEDIATE RELEASE

# Ultimus Wins 2018 IT Innovation Award for BPM Technology

*Inspiring. Alive. Digital. Under this motto, several hundred companies with their innovative IT solutions applied to the 2018 IT Innovation Awards (Innovationspreis-IT 2018), and stood up to the verdict of the expert judges.*

**New York, NY – April 12, 2018** – German online media firm Huber Verlag für Neue Medien, and its partners announced that Ultimus, Inc., a leading global provider of business process-related technology and enterprise solutions, was selected as the winner of the 2018 IT Innovation Award for its technology platform: [Composed Process Solutions](#), a blockchain-enabled BPM product.

Now in its 15th year, the German Innovationspreis-IT award winners are selected by a panel of industry experts in 38 different Information Technology categories.

In the 2018 Business Process Management category, the Innovationspreis-IT judges recognized the ability of Composed Process Solutions to quickly and easily blockchain-enable enterprise software applications.

Using the [blockchain capability](#) of Composed Process Solutions, Ultimus customers are provided with an exceptionally strong method of ensuring the secure, transparent, authentic, and credible execution of their business processes across all process participants – from customers, to suppliers, to partners, and even IoT devices – by anchoring documents and process data to a blockchain in a scalable, cost effective, and standardized way.

Leigh Michl, Ultimus' Chairman & CEO, said "We are proud to be recognized by the Innovationspreis-IT experts for overcoming one of the principal challenges of digital transformation – ensuring the integrity of process data and documents. I'd like to recognize and thank the many, many Ultimus colleagues whose vision and tenacity helped us create the most innovative and powerful digital process automation platform available".

About Ultimus:

Ultimus is a global company and a leader in digital process automation. Ultimus is the developer of Composed Process Solutions, a generative low-code application development platform; the patented Ultimus Adaptive BPM Suite; and Ultimus Advanced Task Service, the only technology ensuring productivity, performance, and scalability of in-production business process applications. These technologies, coupled with Ultimus Enterprise Solutions services, make digital transformation a practical reality through fast, cost effective, and manageable digitization of business processes – across all devices, languages, use cases, and deployment scenarios.
