Upcoming Ultimus Webinar "*Using Low-Code BPM Platforms to Accelerate Digital Transformation" to Include* Industry Leading Panel of Experts

Featuring Clay Richardson, Principal Analyst at a leading independent research firm, Hasan Irmak, CEO of ImageWare AG, and Carsten Neumann of Ultimus

New York, NY – September 6, 2016 – Ultimus, Inc., a leading provider of low-code BPM technology, today announced the addition of an industry leading panel of experts to the lineup of presenters for their upcoming webinar: *Using Low-Code BPM Platforms to Accelerate Digital Transformation* to be held on Wednesday, September 21, 2016 at 10AM ET/ 4PM CET/ 6PM GST.

The webinar will feature guest speaker Clay Richardson, a Principal Analyst in the BPM and low-code development domains at Forrester Research. Clay will describe low-code BPM platforms, explain the drivers of their growing popularity, and show how they are creating a new business case, and priorities, for BPM investments.

Carsten Neumann, Ultimus Senior Vice President, will introduce *Composed Process Solutions*, Ultimus' new "industrial approach" to low-code development, and describe how automated manufacturing – generating software from business requirements - produces unmatched improvements in application delivery time, quality, manageability, cost - and business value.

The list of presenters was recently expanded to include Hasan Irmak, CEO of ImageWare AG, one of the leading Swiss integrators of Enterprise Content Management (ECM) solutions. Hasan will give his unique perspective on low-code platforms and his experience with them in the real world.

Business leaders driving digital competitiveness initiatives, IT leaders, and AD&D and BPM professionals will learn how:

- Digital acceleration will be the primary focus of BPM investments
- Digital business creates new requirements for BPM platforms
- To choose a platform that produces better applications, not just more
