Don't be left unsupported. Upgrade now with help of the Ultimus Upgrade Service.

Better Support your Enterprise-wide Solutions

Ultimus Adaptive BPM Suite 2014, now with its R2 (release 2), is the latest version release for Ultimus 8 users, that brings many new enhancements and benefits to those who upgrade.

V2014 contains various improvements for high load and mission critical environments, especially in regard to security, privacy, compliance and business continuity that will increase the usability of Ultimus Adaptive BPM Suite when developing and maintaining process solutions.

Enhancements and features of Ultimus Adaptive BPM Suite 2014 include:

Improved support for high load and Network Load Balanced environments – Through these improvements, administration of NLB environments has been simplified and has improved support for enterprise-class high load scenarios.

Improved support for secure environments – Authentication and authorization additions have been introduced for enhanced security. This way users can completely lock/secure the BPM server after installation. To ensure authorized only access, access rights can be granted to selected users.

Unique performance optimization services – Ultimus offers customer specific performance optimization services. This enables the Ultimus Professional Services team and Ultimus Support to analyze and optimize Ultimus 2014 systems specific to you and your business for maximum performance.

Support for the most recent Microsoft versions – To ensure your process deployments are fully supported, Ultimus Adaptive BPM Suite 2014 R2 also supports newer versions of Microsoft programs and technology. This includes support for Windows 8 / 8.1, IE 10 and IE 11, Windows Server 2012 / 2012 R2 and MS SQL Server 2012. By supporting these latest versions, V2014 allows you to protect your investment in process solutions and extend the value of your BPM initiatives.

Ultimus Adaptive BPM Suite 2014

Ultimus UATS/WebClient support – Ultimus 2014 R2 now supports Ultimus Advanced Task Service (UATS) with its end user environment, Ultimus WebClient 2015, which are available separately. This allows users to interact with their processes and tasks in a single browser-based UI dashboard with greater speed and flexibility.

The screenshot displays the Ultimus Enterprise Solutions interface. The top navigation bar includes options like View, Delete, View Status, Abort, UltimusSupport, Backup, Case Content Search, and Knowledge Base. The main content area shows a table of completed support cases. The table has columns for Process, Step, Task Start, Case Number, Priority, and Type. The data rows show various 'InSupport' cases with their respective start times, case numbers, and priorities.

Process	Step	Task Start	Case Number	Priority	Type
InSupport	InSupport	4/1/2015 9:24:04 AM	40973	Serious	Product Issue
InSupport	InSupport	4/1/2015 9:24:04 AM	41264	Minor	Product Issue
InSupport	InSupport	3/27/2015 2:02:26 AM	41264	Minor	Product Issue
InSupport	InSupport	4/9/2015 12:59:37 PM	50326	Serious	Product Issue
InSupport	InSupport	4/15/2015 12:54:12 PM	50326	Serious	Product Issue
InSupport	InSupport	4/9/2015 12:53:32 PM	50343	Normal	Product Issue
InSupport	InSupport	4/1/2015 12:22:04 PM	41123	Serious	Product Issue
InSupport	InSupport	3/23/2015 7:23:44 AM	40973	Serious	Product Issue

Ultimus Audit and Log – A new add-on module *Ultimus Audit and Log* for Ultimus 2014 has been developed, which enables and visualizes the tracking (audit and log) of configuration and system changes in Ultimus administrative modules. This add-on module is available separately.

As the solution allows full audit of administration activities the range of fields where Ultimus can be utilized has been widened with those areas where tracking of configuration and system changes is a security requirement.

How to Upgrade

The upgrade to Ultimus 2014 should only be performed by a trained Ultimus expert, as such an upgrade needs to be able to properly handle the complexity of the existing environment and involving technologies. Therefore, Ultimus is happy to assist or handle the full upgrade for you.

If you have not yet upgraded, sign up at www.ultimus.com/bpm-suite-2014-upgrade. During an upgrade service call, your possible upgrade options will be discussed, and we will assist you with your plans to ensure an efficient upgrade.
