- Using Ultimus Reports

Ultimus Advanced Training

Training Course Overview

The Ultimus Adaptive BPM Suite is a complete, enterprise software application designed to create an operational environment that empowers people in an organization to drive process automation and improvement. The product is made up of multiple modules, seamlessly integrated together and is designed to support the needs of all BPM stakeholders in the company including management, work teams, IT teams, and business analysts. The Ultimus Advanced Training course is built around many of the advanced topics that are used to design solutions within Ultimus Adaptive BPM Suite.

Intended Audience

This course is intended for experienced users who are familiar with designing or building workflow processes with Ultimus BPM Studio. This course is geared towards users who want to learn how to build and maintain workflows that use advanced workflow design techniques for their businesses.

Prerequisites

Successful completion of the Ultimus Adaptive Suite Fundamentals training course is a must. Experience with Ultimus in a development or production environment and knowledge of SQL and relational databases is also desirable.

Potential Next Steps

After completion of this training course, users can select either Enterprise Integration Kit (EIK) training or request a custom course that is tailored to fit their company's needs.

Ultimus Advanced Training

Select the Most Beneficial Training Type

On-site Training - If businesses need to increase the skills of multiple employees, Ultimus On-site Training may be the best choice for several reasons:

- Users can adapt the content to their specific needs
- Workers remain on-site in case of emergency
- It saves time and travel costs
- Instructors can discuss specific problems with learners one-on-one
- Scheduling is flexible
- There are increased price savings for larger groups
- The learning environment is friendly and comfortable

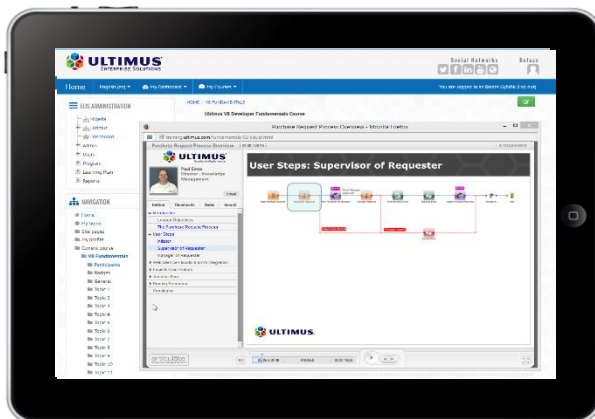

Classroom Training - This is for businesses that want to minimize the costs parallel to maximizing benefits from a live training provided at one of our training centers.

Live Online Training - Travel and accommodation costs can be eliminated with Online Training. Employees get a seat in a virtual classroom with training led by a live instructor.

On-demand E-learning - Participants can learn the basics on-demand at their own pace, and can utilize advanced trainings in any of the other three forms more effectively.

Ultimus Training Integrates with New Technologies

Through integrated online and classroom courses, Ultimus provides a truly blended learning approach. Online offerings are not only an economical alternative, but they are also an effective way to accelerate the understanding and deployment of the Ultimus Adaptive BPM Suite.
