

Ultimus BPM Suite 7.1 - Log Messages

07 July 2007

This document lists all possible log messages that can be logged by Ultimus Administrator. It must be noted that these messages contain variables %s and %d; referring to replacement strings and integers. When messages are logged, these variables are replaced with the appropriate data. For example, "Cannot find Step '%s' in Process '%s'" will be logged as "Cannot find Step 'Prepare Report' in Process 'Activity Report'". Similarly, "Failed to Update New Incident Number '%d', Retrying..." will be logged as "Failed to Update New Incident Number '132', Retrying..."

ID	MESSAGE
0	Task Submitted Process '%s' Incident %d TaskId '%s'
1	Cannot find Step '%s' in Process '%s'
2	Task Submit succeeded Task Status code %d, TaskId '%s'
3	Task Submit failed Task Status code %d, TaskId '%s'
4	Cannot return a Step with multiple users Process '%s', Incident %d, Step '%s'
5	Task submitted with invalid status code %d, TaskId '%s'
6	Invalid TaskId '%s'
7	Invalid Process data received while installing Process '%s'
8	Cannot install Process '%s', Map file is either Corrupt or it is not a wfl file
9	Process Installation failed for Process '%s'
10	Incident Abortion failed, Process '%s' Incident %d
11	Cannot delete Incident %d Process '%s', All Steps must be Completed or Aborted
12	Cannot delete Incident
13	Cannot Assign Process '%s', Step '%s' to User '%s' due to database errors.
14	Cannot Assign All future Task(s) of User '%s' to User '%s' due to database error(s).
15	Cannot Assign Task '%s', Non Assignable or Conferred tasks cannot be assigned.
16	Cannot Assign Task '%s' due to database error(s)
17	Cannot create Task(s) for Step '%s', Process '%s'
18	New Incident Creation failed, Process '%s'
19	Cannot Activate, Incident is already Aborted or Completed.
20	Incident Activation Failed
21	Cannot Abort, Incident is not Active
22	User '%s' cannot abort this Incident, Only owner of the incident can do so.
23	Incident Aborted.
24	Unable to find Incident
25	Unable to change the status to PENDING.
26	Task Completed TaskId '%s'.
27	Cannot Activate Next Step(s) for TaskId '%s'
28	Cannot get Activation ID for Step '%s'.
29	Step Activation failed, Step '%s'.

- 30 Failed to add log event for Task '%s'.
- 31 Incident Activated.
- 32 Cannot Activate Previous Step(s) for Task '%s'
- 33 Step Returned Label '%s'.
- 34 Cannot find Previous Steps for Task '%s'.
- 35 Failed to get Step Status for Step '%s' ID '%s'
- 36 Cannot Activate Step %s, Some Previous Step is Undetermined or Active
- 37 Cannot determine the Status of Previous Step(s) for Step '%s'.
- 38 Cannot Activate Step '%s', All previous Step(s) are Skipped.
- 39 Step Skipped, Step '%s'.
- 40 Incident Complete.
- 41 Maplet Task Submitted for Completion TaskID '%s'.
- 42 Failed to Update Incident record.
- 43 Failed to load Global Variables.
- 44 Failed to load Main SpreadSheet.
- 45 Failed to load Incident record with following database error.\n%s
- 46 Failed to delete incident record, Following error was returned by database.\n%s
- 47 Property not found. Object '%s', Property '%s'.
- 48 Unable to get property value, Object '%s', Property '%s'.
- 49 Failed to get binary column '%s' from table '%s' with following database Error\n%s
- 50 Some of the parameters are invalid for function '%s'.
- 51 The following database error occurred in function '%s'\n%s
- 52 Cannot Load Initiate task.
- 53 Cannot Get New Incident Number.
- 54 Do not have read access permission, Path '%s'.
- 55 Map file is Corrupt, Path '%s'
- 56 Cannot Find Process.
- 57 Flobot Step '%s' is not trained.
- 58 Step '%s' has invalid recipient.
- 59 Sub Process '%s' is not installed.
- 60 No Process map is loaded.
- 61 This process has not changed from the published version. Process will not be installed
- 62 Cannot Install new Process. Maximum Process Port License Limit is exhausted. Please contact your Ultimus System Administrator
- 63 Cannot save new Process.
- 64 Cannot Save Step '%s'.
- 65 Cannot save assignment record for Step '%s'
- 66 Cannot Save EMail.
- 67 Cannot UnInstall, There are some active incidents.

- 68 Failed to UnInstall Process.
- 69 Cannot Upgrade Condition Tables for Step '%s'.
- 70 Failed to upgrade properties for Step '%s'
- 71 Failed to Upgrade Step '%s'.
- 72 Failed to upgrade Process properties('%s').
- 73 Failed to Upgrade Main Spreadsheet.
- 74 Cannot Delete Step '%s'.
- 75 Incident number cannot be negative.
- 76 Failed to Update New Incident Number '%d', Retrying...
- 77 Step %s is already active.
- 78 Cannot Create Task Object(s) for Step '%s'
- 79 Returning Junction/Maplet/Flobot Step '%s', while returning Task '%s'
- 80 Cannot Create Queued Component for Interface '%s'.
- 81 Failed To Submit Task '%s'.
- 82 Failed to Launch SubProcess '%s'
- 83 Step '%s' is now Activated
- 84 Loading Existing Task(s) for StepId '%s'.
- 85 Failed to Mark Step '%s' as Skipped.
- 86 Cannot Create Recipient Evaluator Component.
- 87 Cannot resolve Recipient(s) for Step '%s'.
- 88 Cannot Abort Step '%s', None of the Task(s) for this step is Active, delayed or In Queue.
- 89 Cannot Abort Step '%s'.
- 90 Cannot Get Flobot Training and Template for Inline Flobot '%s'.
- 91 Cannot find Registration entries for Flobot '%s'.
- 92 Cannot Create Flobot Object for Flobot '%s'.
- 93 Timeout expired for Flobot '%s'.
- 94 Failed to get Activation ID for Step '%s'.
- 95 Task Activation failed for Step '%s'
- 96 Failed to mark Task with ID '%s' as completed.
- 97 Minimum Response threshold has been reached for Step '%s'.
- 98 Cannot Mark Task with ID '%s' as FAILED.
- 99 Failed to mark Task with ID '%s' as RETURNED.
- 100 Failed to Load Task with ID '%s'.
- 101 Cannot Create OC services component.
- 102 Cannot Next Member for Group '%s', User '%s'.
- 103 Failed to save Task with Id '%s'.
- 104 Invalid value '%s' specified for Process Completion Time.
- 105 Invalid Process name '%s' specified in TxtCommand file '%s'.

- 106 Unable to set Value '%s' of Variable/Cell Reference '%s' to the spreadsheet, specified in the Txtcmd File '%s'.
- 107 Invalid Process Owner '%s' specified in TxtCommand file '%s'
- 108 Cannot Initialize Mail Dll '%s'.
- 109 Unable to process auto launch mails the Following error was returned\n%s.
- 110 Invalid Mail dll '%s'.
- 111 Cannot launch new incident for Process '%s', Process is disabled.
- 112 Cannot Submit Task '%s', Incident status is Aborted.
- 113 Cannot Submit Task '%s', Incident status is Complete or Aborted.
- 114 Incident Stalled.
- 115 Cannot Update Process '%s', it is Disabled, Enable the Process first.
- 116 Performing HouseKeeping function %s.
- 117 Task Assigned, Original User = '%s', Assigned User = '%s'.
- 118 Inline Flobot Executed '%s' successfully.
- 119 Inline Flobot Execution '%s' failed..
- 120 Process Installed, Version %d.
- 121 Step '%s' is now completed.
- 122 Deleting older log entries.
- 123 Deleting txtcmd file '%s' returns error '%s'.
- 124 Step '%s' is Delayed
- 125 Condition '%s %s' evaluated to %s, Condition was evaluated as, %s.
- 126 Invalid Variable '%s' found while installing Process '%s'.
- 127 No child process is selected for maplet step %s
- 128 Step '%s' is Overdue now
- 129 Step '%s' is Late now
- 130 Task with Id '%s', Step '%s', has been disowned by '%s'
- 131 Begin task cannot be returned.
- 132 Unable to create step '%s' spreadsheet.
- 133 Unable to create main spreadsheet.
- 134 Cannot Connect to database the following error was returned\n%s
- 135 Cannot enlist in distributed transaction the following error occurred\n%s
- 136 Action '%s' for process '%s' cannot be published.

- 2001 Could not read/convert view for %s, %s
- 2002 %s form does not exist for step %s of process %s. Please create the form in order to access that
- 2003 Could not get tasks for view "%s", user "%s"
- 2004 Could not access %s. Reinstalling or Registering the correct version of %s may solve the problem.
- 2005 Could not start transaction

- 2006 Could not get FloStation groups.
- 2007 Unsupported format for %s
- 2008 Could not connect to %s database
- 2009 Could not encode %s
- 2010 Databound columns for %n processes requested. Cannot get databound columns for more than one process.
- 2011 Could not get databound info for process "%s"
- 2012 Could not get tasks for view "%s", user "%s". Query failed
- 2013 Could not get databound Columns for view "%s", user "%s". Query Failed
- 2014 Error occurred while archiving resultant tasks for view "%s", user "%s"
- 2015 Failed to prepare results for view "%s", user "%s"
- 2016 Failed to execute query on %s
- 2017 Could not find task having task id "%s", user "%s"
- 2018 Failed to get next FloStation task for FloStation "%s". Query Failed
- 2019 Task "%s" could not be deleted. Query Failed.
- 2020 Task "%s" is not deleteable.
- 2021 Could not mark initiate task of Process %s, Version %d as enabled/disabled. Query failed
- 2022 Could not get child incidents for Task "%s". Query failed.
- 2023 Could not get latest version of %s. Query failed
- 2024 Error occurred while archiving Process query.
- 2025 Error occurred while archiving Step filter.
- 2026 Could not get steps for process "%s", version "%d". Query failed
- 2027 Could not get Map for process "%s", version "%d". Query failed
- 2028 Failed to read user groups
- 2029 Failed to prepare results
- 2030 Access denied: file's permission setting does not allow specified access.
- 2031 Could not delete %s
- 2032 Failed to create file %s
- 2033 Cannot Upload the file since it is already locked by user %s
- 2034 Could not get attachment dir.
- 2035 Could not get parent-task information for process "%s", incident "%d".
- 2036 File %s does not exist
- 2037 Conversion Failed: Either the array was not a valid safearray descriptor or the array could not be locked.
- 2038 Query Failed: Could not get tasks for FloStation
- 2039 Failed to get information about user %s
- 2040 Could not get current task record.
- 2041 Could not go to next task record
- 2042 Commit failed: Trasaction to get next queue task for FloStation

2043 VariantToMem failed: Either safearray format is invalid or heap allocation attempt failed.

2044 Could not assign task "%s" to user %s. Engine returned failure.

2045 Could not assign all future tasks of "%s" to user %s. Engine returned failure.

2046 Could not assign all current tasks of "%s" to user %s. Engine returned failure.

2047 Could not convert array to safearray

2048 Task "%s" could not be marked as deleted. Query Failed.

2049 Task "%s" could not be put into queue. Query Failed

2050 Recipient of Task "%s" is not of type Queue

2051 Could not get status of task "%s". Query failed

2052 Commit failed: Trasaction could not be completed.

2053 Task "%s" could not be marked as failed. Engine returned failure.

2054 Task "%s" could not be marked as returned. Engine returned failure.

2056 Could not save task "%s", user %s. Query failed

2057 Could not prepare results. Error occurred while archiving variables for task "%s", user %s

2058 Could not get variables for task "%s", user %s. Query failed

2059 Conversion failed: Could not create safearray from string array.

2060 Error occurred while archiving %s filter

2061 Could not prepare results. Error occurred while archiving variables

2062 Could not get Form URL for task "%s"

2063 Could not get form info

2064 Could not get spreadsheet for task "%s". Query Failed

2065 Could not get spreadsheet for task "%s". Query Failed

2066 Could not get data for task "%s", user %s. Query failed

2067 Could not create ILockbytes on HGLOBAL

2068 Could not open storage on ILockBytes

2069 Could not get parent task info for process "%s", incident %d. Query failed

2070 Could not activate step "%s". Engine returned failure

2071 Could not delete incident. Engine returned failure

2072 Could not abort incident. Engine returned failure

2073 Error occurred while archiving Incident variables

2074 Could not get Incident spreadsheet

2075 Could not get incident variables. Query failed

2076 Failed to load incident variables

2077 Could not update incident spreadsheet. Query failed

2078 Could not get incident spreadsheet. Query failed

2079 Could not get incident memo. Query failed

2080 Failed to get task for user %s

2081 Could not get incident status. Query failed

2082 Failed to get last incident of process "%s"

- 2083 Could not get last incident of process "%s". Query failed
- 2084 Could not set process manager to %s for process "%s", version %d. Query failed
- 2085 Failed to get last version of process "%s"
- 2086 Could not get manager of Process %s, Version %d. Query failed
- 2087 Could not enable Process %s, Version %d. Query failed
- 2088 Could not install the Process. Engine returned failure
- 2089 Could not get Process Versions . Query failed
- 2090 Could not get installed processes. Query failed
- 2091 Could not get full name of user "%s". OC returned failure.
- 2092 Failed to get full name(s) of user(s) from OC.
- 2093 Could not get active users. Query Failed.
- 2094 Could not create F1Bookveiw because of this error: %s
- 2095 Could not get Spreadsheet for task "%s". Query Failed
- 2096 Could not write Spreadsheet to cache file %s
- 2097 Error occurred while reading cache file %s
- 2098 Could not get variables for task "%s". Query Failed
- 2099 Could not load local variables. IVars returned failure
- 2100 Could not load global variables. IVars returned failure
- 2101 Failed to write Main Spreadsheet to temp file %s due to this error: %s
- 2102 Could not update Main Spreadsheet of the incident. Query failed
- 2103 Can not update Main Spreadsheet because it is not loaded
- 2104 Could not load Main Spreadsheet. Query failed
- 2105 Either Spreadsheet for the incident was not found or the result is invalid
- 2106 Spreadsheet format is invalid
- 2107 Could not write Spreadsheet to cache file %s
- 2108 Could not create CF1Bookview because of this error: %s
- 2109 Failed to read Main Spreadsheet from temp file %s due to this error: %s
- 2110 Could not find incident. Query failed
- 2111 Incident was found but the format is invalid.
- 2112 Could not get Main Spreadsheet of the incident. Query failed
- 2113 Can not get incident properties. Serialization of CUIncident to an in-memory file failed due to this error: %s
- 2114 Can not get incident variables names because variables could not be loaded.
- 2115 Can not get value(s) of variable %s because Spreadsheet of the incident could not be loaded.
- 2116 Could not get value(s) of variable %s. Spreadsheet returned failure.
- 2117 Can not set value(s) of variable %s because Spreadsheet of the incident could not be loaded.
- 2118 Could not set value(s) of variable %s. Spreadsheet returned failure.
- 2119 Failed to update Main Spreadsheet of the incident.

- 2120 Can not get value of variable %s by index %d because Spreadsheet of the incident could not be loaded.
- 2121 Could not get value of variable %s by index. Spreadsheet returned failure.
- 2122 Can not set value of variable %s by index %d because Spreadsheet of the incident could not be loaded.
- 2123 Could not set value of variable %s by index %d. Spreadsheet returned failure.
- 2124 Can not get incident variables because variables could not be loaded.
- 2125 Can not get incident variables because Spreadsheet of the incident could not be loaded.
- 2126 Failed to read incident variables from CUVariableList due to this error: %s
- 2127 Can not update incident variables. De-serialization of an in-memory file to Variable List failed due to this error: %s
- 2128 Can not update incident variables because Spreadsheet of the incident could not be loaded.
- 2129 File %s does not have read permission.
- 2130 Could not load file %s into a string object.
- 2131 Compilation of file %s failed because of this error: %s
- 2132 Class %s was not found in %s.
- 2133 Could not access %s because of this error: %s.
- 2134 Could not get task interface for user %s, task %s.
- 2135 Could not get incident interface for process %s, incident %d.
- 2136 Could not get task from engine.
- 2137 Task interface not found.
- 2138 Could not get incident from engine.
- 2139 Incident interface not found.
- 2141 Could not set incident property because of this error: %s.
- 2142 Can't pass incident context. Incident interface does not exist.
- 2143 Can not pass task context. Task interface does not exist.
- 2144 Could not set task property because of this error: %s.
- 2145 Failed to pass incident context.
- 2146 Property %s does not exist.
- 2147 Could not set property %s.
- 2148 Could not get property %s.
- 2149 Method %s does not exist.
- 2150 Can not call .Net code for task. Failed to initialize incident from incident interface.
- 2151 Can not call .Net code for task. Process '%s', incident %d. Failed to initialize incident from database.
- 2152 Can not call .Net code for task. Failed to initialize task from task interface.
- 2153 Can not call .Net code for task '%s' of user %s . Failed to initialize the task from database.
- 2154 Could not perform .Net code actions for task.
- 2155 Can not call .Net code for incident. Failed to initialize incident from incident interface.

- 2156 Can not call .Net code for incident. Process '%s', incident %d. Failed to initialize incident from database.
- 2157 Incident has initialized.
- 2158 Task has initialized.
- 2159 Can't initialize task. Either task interface was not found or task info was not provided.
- 2160 .Net code for task has executed.
- 2161 .Net code for incident has executed.
- 2162 Could not perform .Net code actions for incident.
- 2163 Can't load variables. Engine's workflow variables object <IVars> is not accessible.
- 2164 Could not set QFLAG for user %s. Query failed
- 2165 Could not uninstall the Process. Engine returned failure.
- 2166 Task '%s' for user %s found.
- 2167 Extracting form...
- 2168 Successfully extracted form.
- 2169 Could not confer task "%s" on user %s. Engine returned failure.
- 2170 Assignment of the task completed. Original user: %s. Assigned user: %s
- 2171 Task "%s" has been conferred. Original user: %s. Conferee: %s
- 2172 Extracting ActiveX form...
- 2173 Can't get queue tasks for user %s. User must be a group member.
- 2174 Finding groups for user %s...
- 2175 Groups found: %d.
- 2176 Getting Queue Tasks for user %s.
- 2177 Queue Tasks found: %d.
- 2178 Can't get queue tasks. No Groups found.
- 2179 Finding Groups...
- 2180 No Queue task found for user %s.
- 2181 QFLAG for user %s has been set.
- 2182 Queue task found for user %s.
- 2183 Could not upgrade the Process. Engine returned failure
- 2184 Process '%s' upgraded successfully.
- 2185 Process '%s' uninstalled successfully.
- 2186 Process '%s' enabled successfully.
- 2187 Process '%s' disabled successfully.
- 2188 Process '%s' installed successfully.
- 2189 No previous versions found for the process.
- 2190 Failed to establish connection with the database using following settings: database='%s', server='%s', user='%s' and password='%s'. Make sure that it is reachable with the provided settings.
- 2191 Failed to get databound columns.

- 2192 Failed to prepare results. An error occurred while reading archived tasks.
- 2193 Error occurred while archiving resultant tasks.
- 2194 Cannot get databound columns. Databound filter is invalid.
- 5501 Failed to get departments, Error : %s
