Composed Process Solutions

Enterprise Workflow Applications at the Speed of Digital

Disruptive software implementation – 80% faster at 80% less cost

Success in today's digital world means creating software faster than ever before. But with accelerating change and rising complexity, the traditional “craftsmen” approach – DEVELOPING one-off solutions using development tools like BPM Suites or Low Code Development platforms – just won't scale.

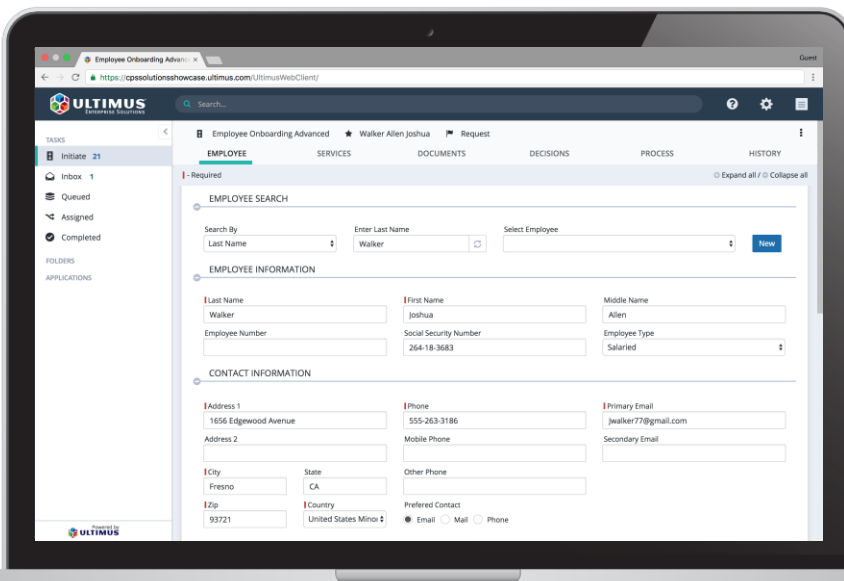

Ultimus has a better way: [Composed Process Solutions](#), the first DELIVERY platform for BPM. Using CPS, Ultimus implementers gather your specific requirements and our Composed Process Solution factory technology takes care of the rest, automatically generating custom solutions in real-time from a standardized architecture using proven, optimized, and error-free solution assets.

A Factory for Enterprise Software

Over the past 20 years, Ultimus has implemented over 1,400 customer solutions using our Adaptive BPM Suite. Despite many apparent differences, we discovered that these solutions had striking similarities!

Using classic engineering principles, we've capitalized on those similarities and created a radically new method of creating software – one that fundamentally changes the economics of solution implementation. Instead of reinventing the wheel over and over and creating one-off solution islands, our CPS factory allows our implementers to take the “what” of your solution and leave the “how” to a machine.

Generate workflow solutions automatically from your business requirements – without writing code

Composed Process Solutions

Stop DEVELOPING and Start DELIVERING

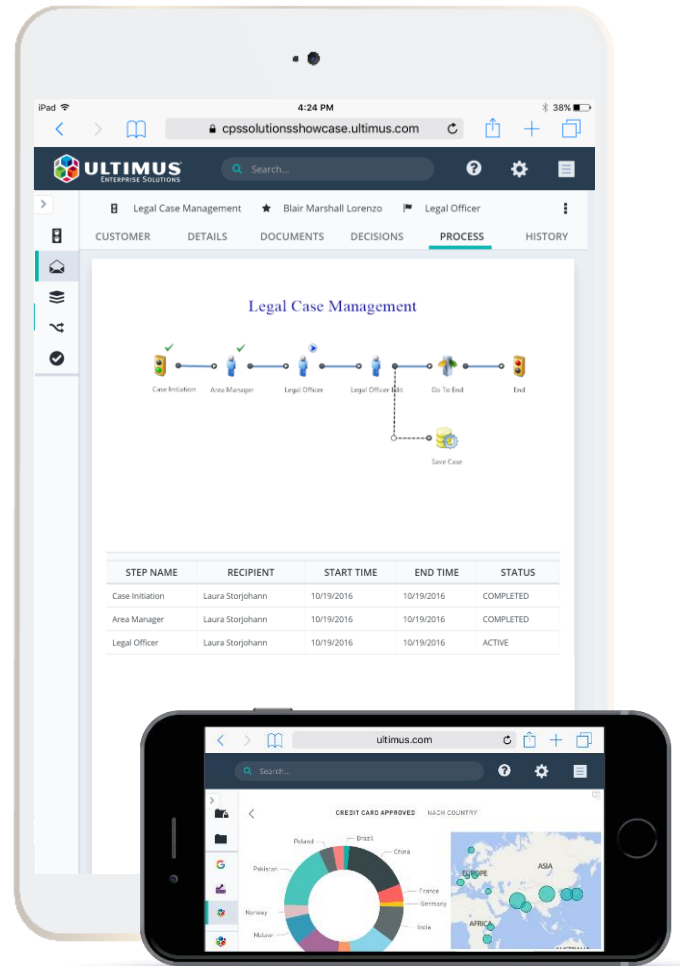

See your process powered by Composed Process Solutions!

Step 1 – Describe the process you would like to automate, or, for our customers, your existing Ultimus solution. We'll discuss it with you, then build it, and demo it on our latest technologies.

We're so confident in the power of our approach, we'll do it for [free](#).

Step 2 – We'll develop a Statement of Work and Project Plan that covers integrations; reporting, dashboards, and archiving requirements; and ensure alignment with your long term needs.

Step 3 – We'll deliver your solution and either manage it for you or in partnership with your team.

To get started and see the disruptive power of CPS, sign up now at www.ultimus.com/CPS-demo.

CPS is designed to work seamlessly and harness the power of our other key technologies - Ultimus Adaptive BPM Suite 2016 and Ultimus Advanced Task Service 2016 - to ensure the performance, usability, productivity, and cost effectiveness of in-production, enterprise business process solutions.

- 80% faster time-to-live at 80% lower cost
- Reliable solution performance at scale
- Automatic deployment of changes without re-compiling, stopping, and restarting servers
- A unified solution portal and standardized solution UI to reduce training
- One code base for mobile and desktop devices and for every language
- Supportability, manageability, and cross-solution compatibility through standardization
